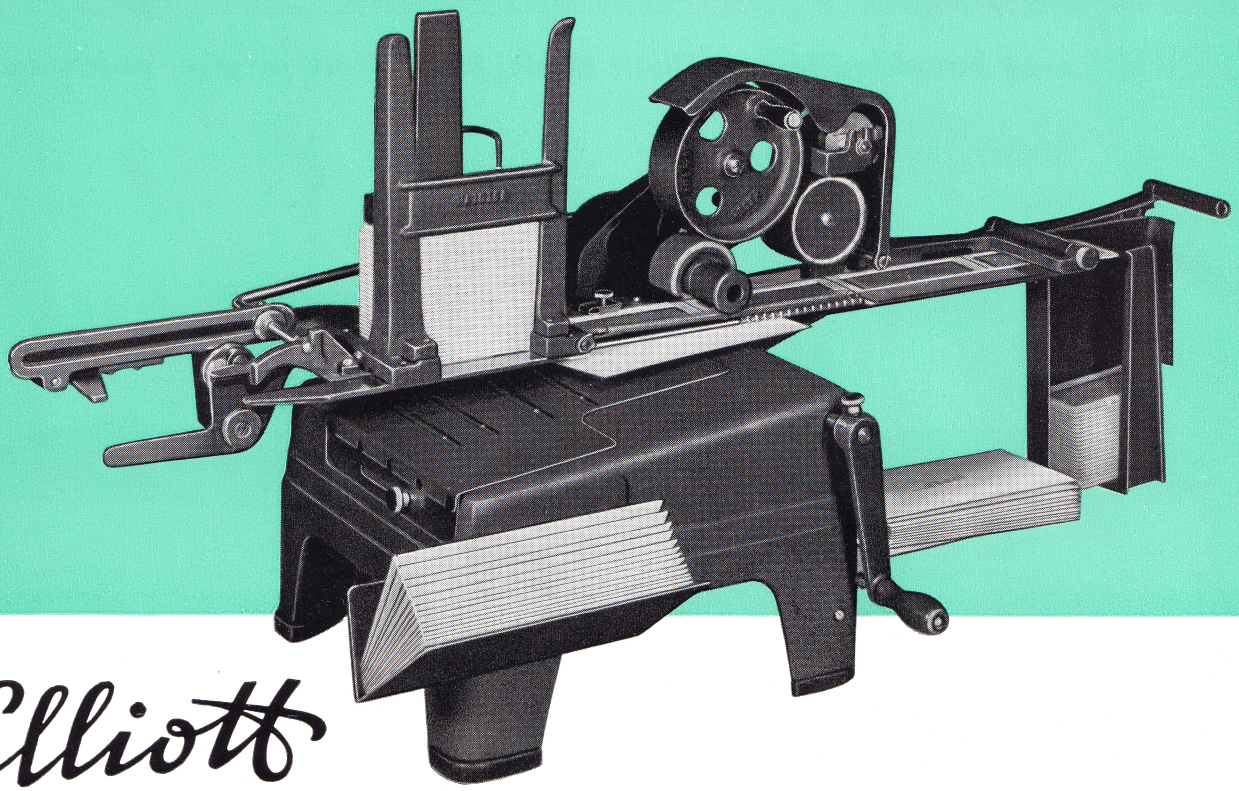
The World's Most Versatile Addressing Machine of Small Size and Popular Price.



Elliott "MODEL 800"

ROTARY HAND-CRANK ADDRESSING MACHINE

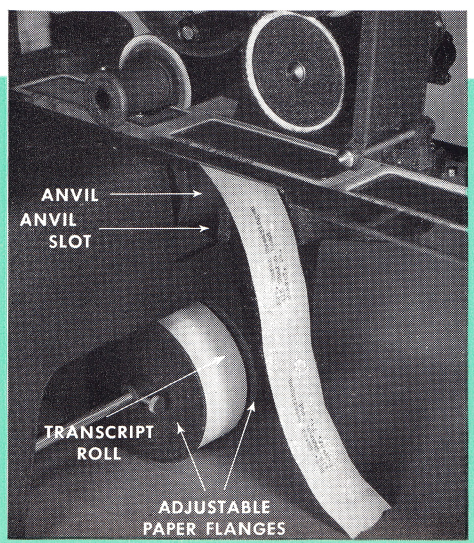
Forms to be addressed are inserted singly, by hand; but machine has *automatic* stencil-feed, *automatic* stencil ejector and *automatic* envelope ejector.

Stencils are loaded and unloaded by the entire trayful of 125.

Machine prints a different address at each revolution of hand-crank — or can be made to skip, repeat or duplicate any address.

Addresses all kinds of envelopes, cards, tags, labels, wrappers, mailing pieces, broadsides, etc., up to approximately 11″ x 14″ in size. Heads up statements and bills, fills in salutations on form letters, etc. Will print transcript of list on continuous roll of paper for checking or other purposes. Will also date forms while addressing.

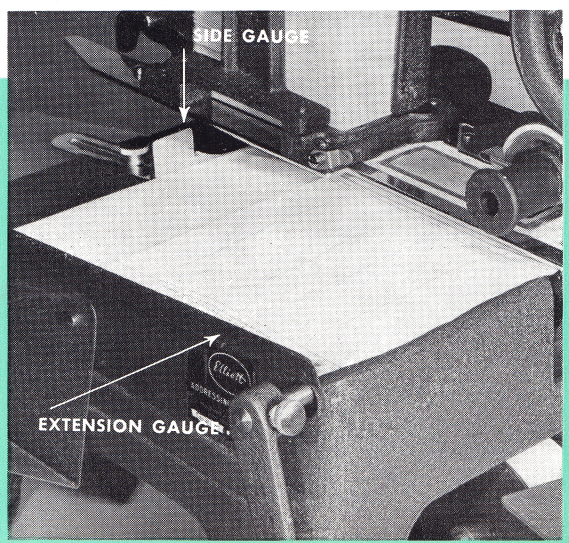
Practically noiseless in operation.



At left, note the attachment for inking new stencils or for taking a transcript of your mailing list on a continuous roll of paper or labels.

As the address roll prints the stencil it will automatically move the transcript paper along.

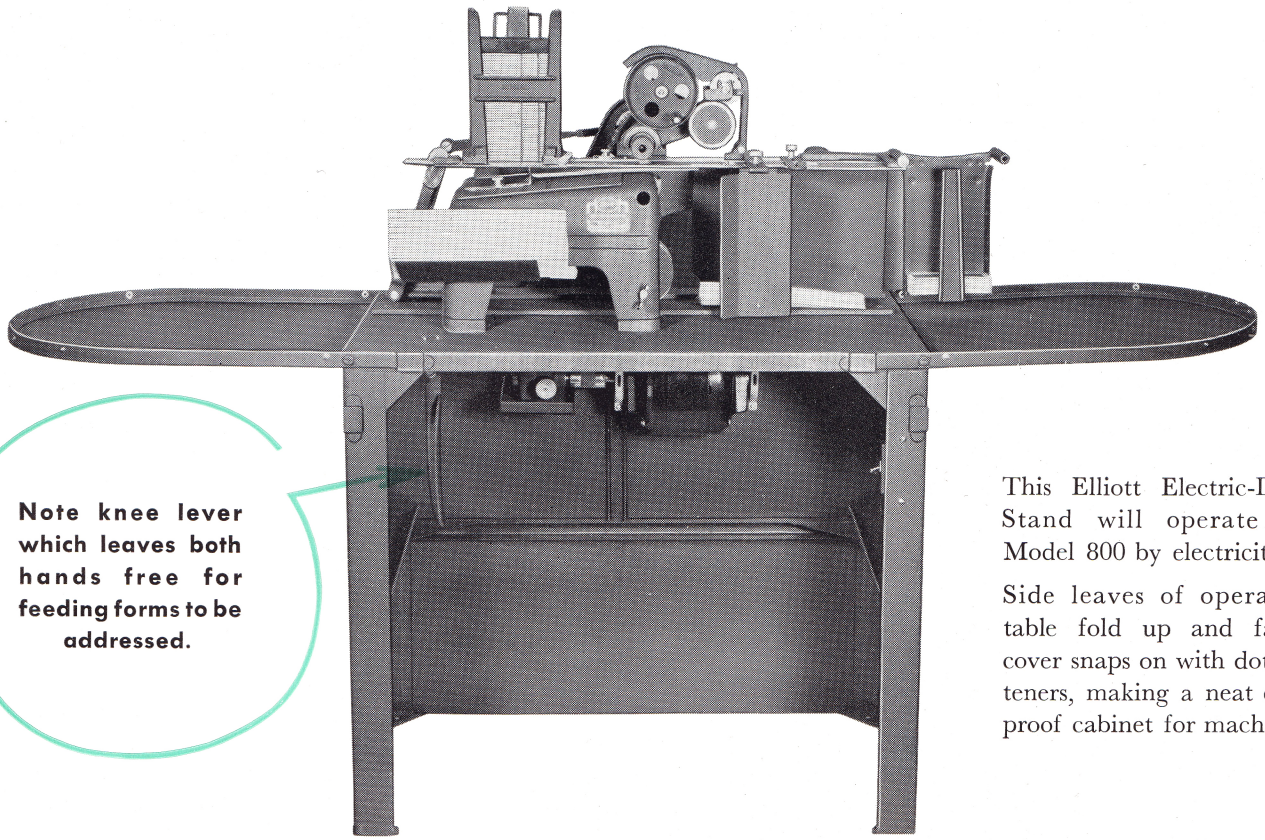
Photo at right shows how addresses are accurately positioned on single sheets such as statements or form letters.



Printed in U.S.A. 2-56D

THE *Elliott* ELECTRIC-DRIVE STAND

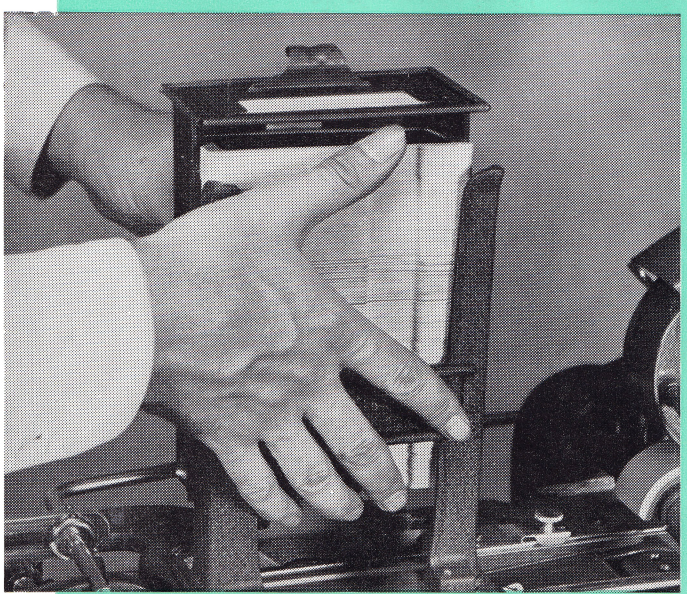
which may be added to any Elliott Model 800 before or after purchase.



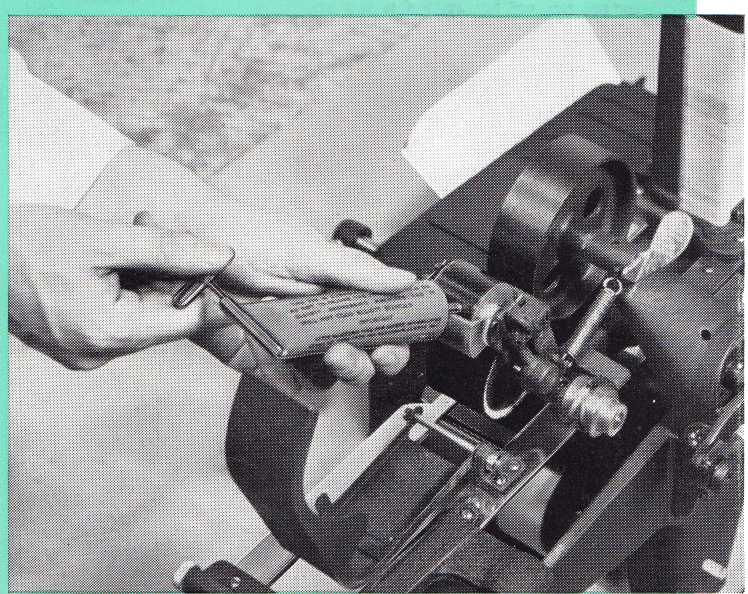
Note knee lever which leaves both hands free for feeding forms to be addressed.

This Elliott Electric-Drive Stand will operate the Model 800 by electricity.

Side leaves of operating table fold up and fabric cover snaps on with dot fasteners, making a neat dust-proof cabinet for machine.



Loading a tray of address cards.



To fill the ink reservoir is clean and easy.
